

«Without a doubt, the book the readers are about to enjoy will become helpful in obtaining the objectives of improving the maternal and infant health in Africa. MATRES MUNDI and ISPEMA have produced a publication comprising a Protocols in Obstetrics and Perinatology adapted to the needs and conditions of the Perinatal Medicine in the African countries.»

Prof. ERICH SALING

President of International School of Perinatal Medicine for Africa (ISPEMA)
Past President of the International Academy of Perinatal Medicine (IAPM)

«The book covers almost all aspects concerning the practice in Obstetrics as shown clearly in the index of the book. The scope of the book is to improve the Obstetric Services in Africa to facilitate maternal health and to reduce the maternal and neonatal morbidity and mortality which are considered the highest throughout the globe.»

Prof. ABDELLATIF ASHMAIG

President of the African Association of Perinatal Medicine (AAPM)

«The mission of this book is to provide fast, neat, concise and accurate information on what to do in a given obstetric and neonatologic situation, both in diagnostic and therapeutic aspects. Obviously this book has been specially designed for intra-hospital assistance, where the unification of criteria is very important and where it is not rare for doctors and midwives on duty to face an unusual condition that requires a prompt decision.»

Dr. JOSE M. CARRERA

Secretary General of the International School of Perinatal Medicine for Africa (ISPEMA)
Founder of MATRES MUNDI
